

Summer Promotion 2017 Hommel-Etamic Surface Finish by Jenoptik.

SHARING EXCELLENCE

Take advantage of exclusive summer discounts on our roughness and contour measuring systems. Save up to 20% on our hand-held shop floor units and lab quality systems.

Hommel-Etamic Handheld Systems

Our handheld family of measurement systems help our customers perform surface finish quality control at the point of impact, right on the manufacturing floor. Backed up by our user friendly Hommel-Etamic EVOVIS Mobile evaluation software, your quality control won't be able to thank you fast enough.

Hommel-Etamic W5 \$1,949.00

- Class 1 Accuracy
- Integrated 5" full color TFT display
- 5 unique measuring programs
- Interchangeable probes
- Shop floor hardened, robust design

Hommel-Etamic W10 \$3,900.00

- Class 1 accuracy
- Wireless operation via bluetooth
- Interchangeable probes
- Integrated roughness standard
- 40 parameters that meet int'l standards

Hommel-Etamic W20 \$6,900.00

- Class 1 accuracy
- Skidless probing system
- Large color touchscreen display
- Integrated roughness standard
- 68 parameters that meet int'l standards

Hommel-Etamic T8000 Systems

Our T8000 family of measurement systems consist of small compact table top systems, all the way up to fully automated shop floor production systems. With a complete line of robust accessories, our T8000's can be configured to measure not only roughness, but also simultaneous roughness and contour in one pass. Backed up by our user friendly Hommel-Etamic EVOVIS evaluation software, your quality control won't be able to thank you fast enough.

Hommel-Etamic T8000R \$29,990

- High precision traverse unit
- Skidless measurement
- Modular structure
- Robust Gauss filter ISO/TS 16610-31
- Shop floor hardened, robust design

Hommel-Etamic T8000C \$34,990

- Vertical measuring range/res. 60mm/50nm
- Wavecontour digital probe system
- Wide range of measurement accessories
- Powerful analysis software
- Large measuring volume

Hommel-Etamic T8000RC \$44,990

- Universal roughness and contour system
- Interchangeable probe systems
- Automatic measuring runs
- 120mm traverse length
- Wide range of measurement accessories
